Receptra Serious Rest CBD + CBN gummies

are formulated to provide improved sleep for your customers. These delicious gummies feature all-natural Mountain Strawberry flavor, and are powered by full Spectrum CBD hemp extract with the added benefits of CBN, a hemp-based cannabinoid known to help to achieve better rest without melatonin.

Ingredient List:

Organic Cane Sugar, Water, Tapioca Syrup, Pectin (Pectin, Sucrose, Citric acid, Sodium Citrate), Full Spectrum Hemp Extract, Natural Strawberry Flavors, Citric acid, Lemon Oil, Cannabinol.

Added Benefits:

CBN (Cannabinol): Receptra's Serious Rest gummies include added CBN which may increase the restful benefits of full spectrum hemp extract for sleep and comfort.

How to Use:

For best results take one gummy orally, 45 minutes before desired sleep. Chew completely before swallowing. An additional gummy may be taken when sleep is more difficult to achieve.

Why No Melatonin:

These CBD gummies for sleep are formulated using CBN and without melatonin to provide an all-natural plant-based option for better sleep.

Melatonin is a hormone that is produced by the human body naturally and is commonly added to "natural" sleep aids, though it is often produced synthetically or from the pineal gland in animals. We believe in using plant-based compounds whenever possible in our products in order to provide the better rest that you & your customers expect, hence the reason melatonin is not included.

Why Our Dosing Makes Sense:

Receptra products are meant to be easy, clear, and safe, with dosing guidelines determined through careful evaluation of the latest scientific research. Each person has unique variances in their endocannabinoid system so we recommend using a small amount of topical and increasing as needed.

Why Receptra's Products?

Receptra's carefully-formulated CBD hemp extracts are made with the highest quality, hand-shucked hemp from their family-owned farm. The extract is then thoughtfully blended with all-natural and organic ingredients and botanicals to enhance the effectiveness of the product to help you bring your best self, depending on your needs.
